

SERVICES

FOR THE METAL WORKING INDUSTRY AND CONSTRUCTION COMPANIES

EVERYTHING FROM A SINGLE SOURCE KEMPER · SURFACE SERVICES

SYNERGIES

IN FOCUS

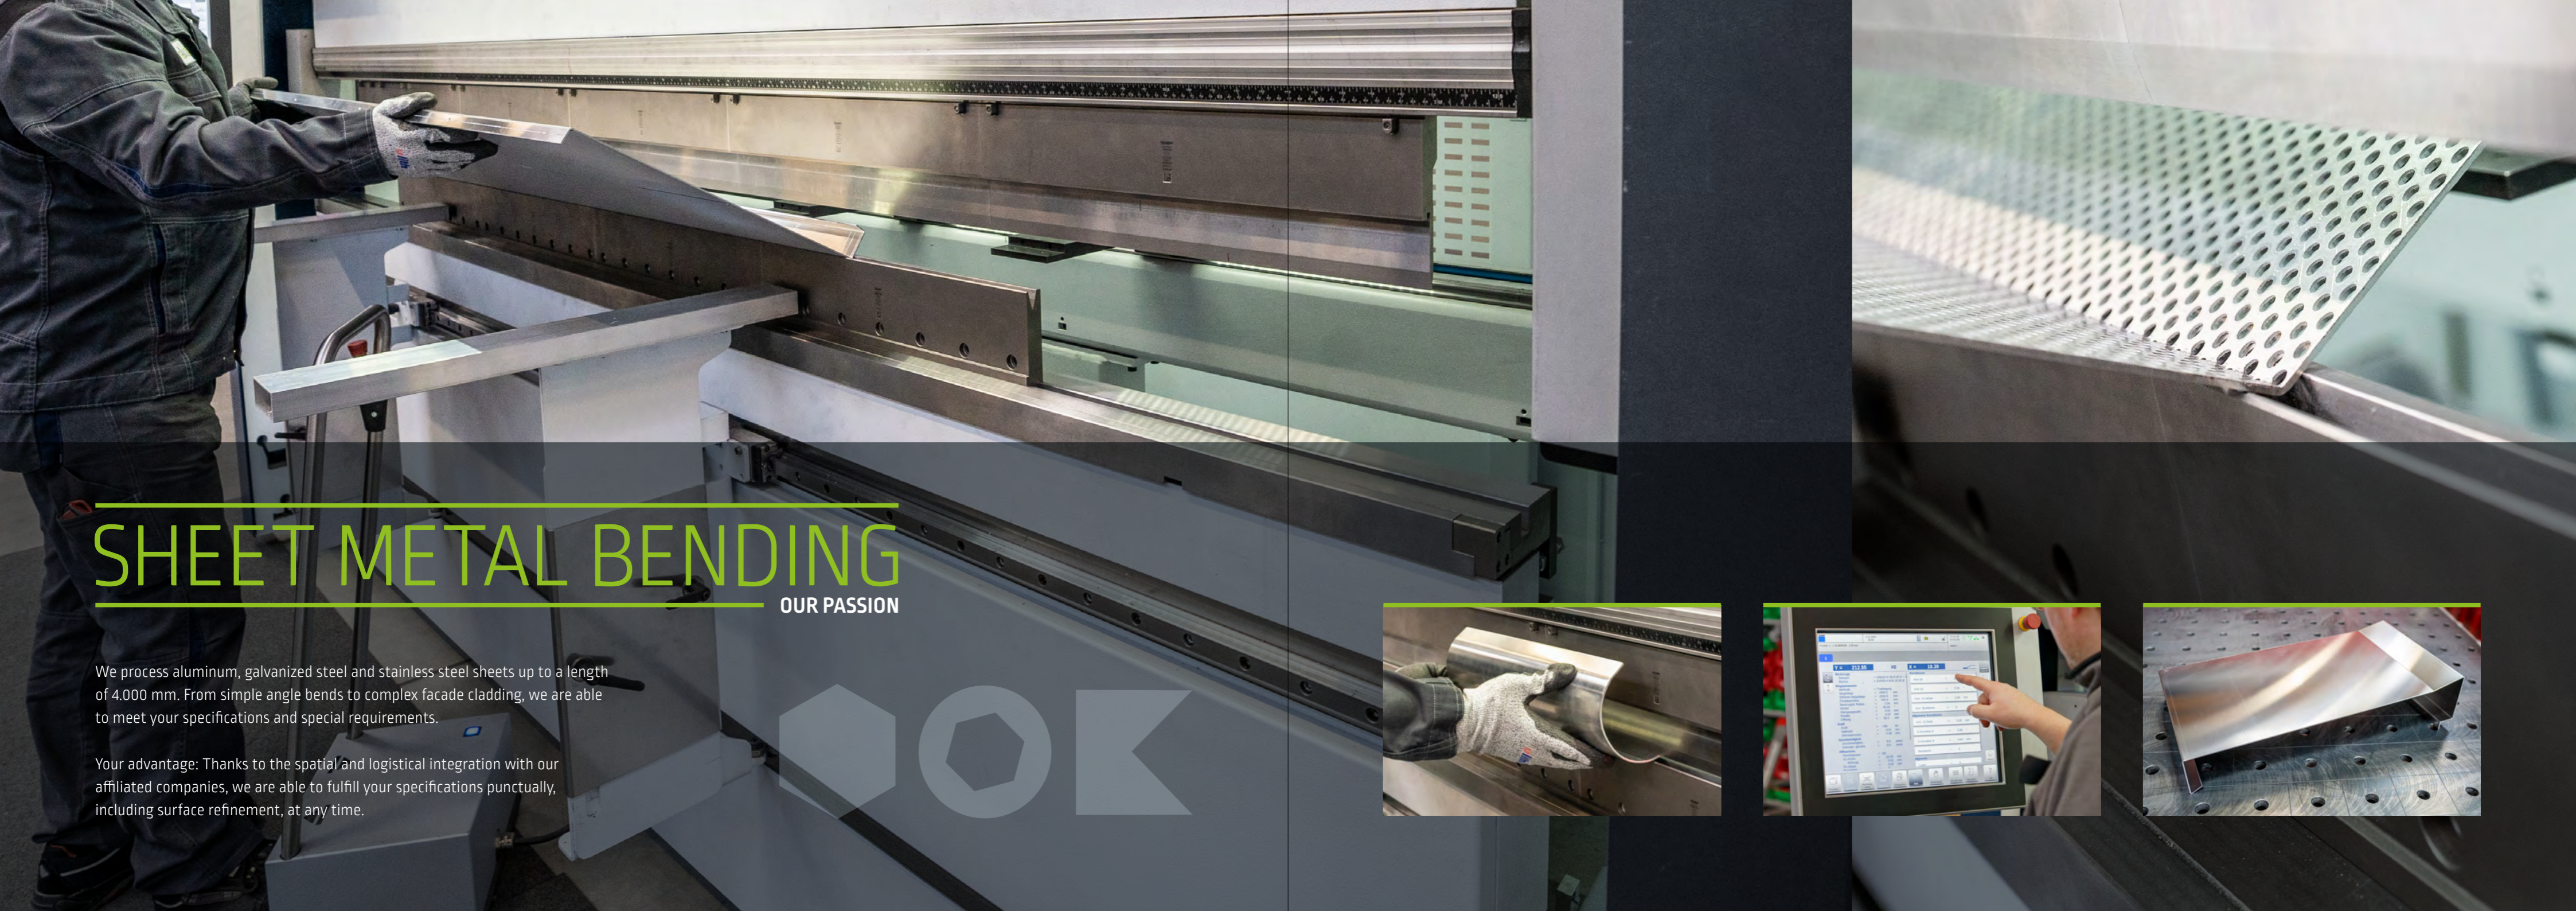

alutexx stands for the highest precision, reliability and flexibility in terms of metal processing and supports companies of all sizes. The companies we supply to include metal construction companies, the metal processing industry and firms in the trade.

As part of the Kemper Group, with our affiliated companies Kemper Oberflächentechnik and Koenigsdorf Oberflächentechnik we offer you everything from a single source:

- powder coating, anodizing and electro ceramic coating
- comprehensive metal processing and machining
- thermal brake assembly
- consistent logistics
- and much more

Short distances, maximum efficiency, reduced complexity and consistent digital workflow – use this added value!

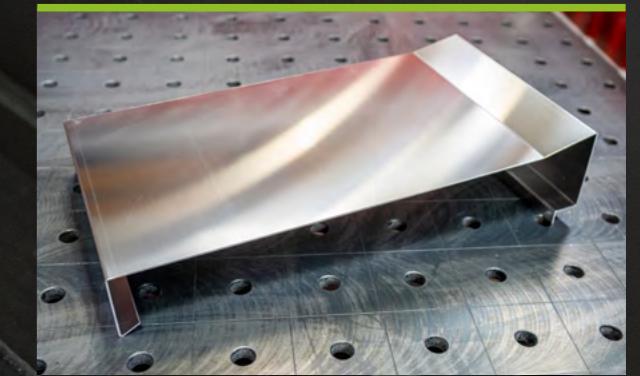

SHEET METAL BENDING

OUR PASSION

We process aluminum, galvanized steel and stainless steel sheets up to a length of 4.000 mm. From simple angle bends to complex facade cladding, we are able to meet your specifications and special requirements.

Your advantage: Thanks to the spatial and logistical integration with our affiliated companies, we are able to fulfill your specifications punctually, including surface refinement, at any time.

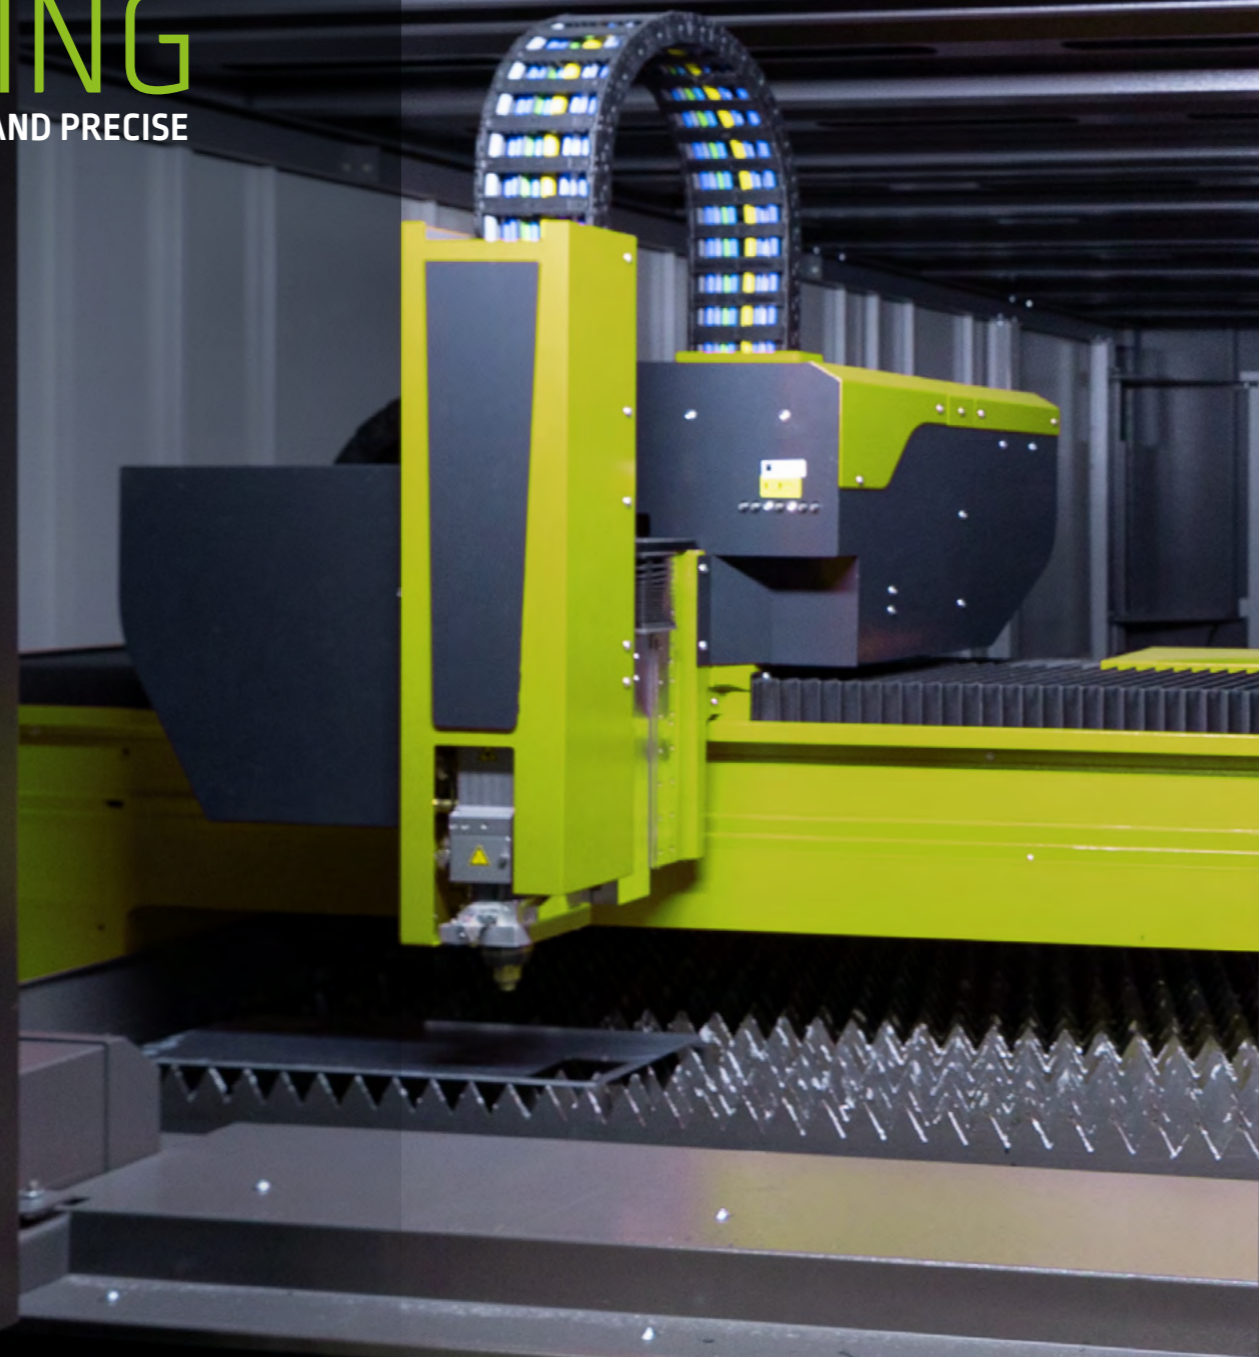

LASER CUTTING

ECONOMICAL AND PRECISE

With our fiber lasers, we can supply you with precise aluminum, steel and stainless steel cuts in freely configurable sizes and contours, which are immediately ready for assembly without any further processing.

This results in many advantages over other processes such as punching or mechanical cutting. Even smaller batch sizes can be produced in a cost-optimized way.

WELDING WORK

HANDMADE BY ALUTEXX

In our welding area, we manufacture individual aluminum constructions by hand. From facade substructures to frames and decorative elements, almost anything is possible. Take a look at the references on our website.

CNC PROFILE MACHINING

ALUMINIUM IN PRECISION

We can process your profiles at short notice, before or after the finishing process, at our bar profile processing centres.

Holes, milling, threaded holes, notches and sections according to your specifications and wishes – we are equipped for every challenge. The maximum profile length is 9.000 mm.

Of course, we also take care of the storage of your raw profile stocks (consignment warehouse) and the complete inventory logistics.
